

# Federal Water Theft

## A PETITION to Governor Schwarzenegger and President Obama

### Save Our Water, Save Our Jobs!

Save California farmers, farm workers and scores of towns and cities from big government's economic Armageddon. Sign Pacific Legal Foundation's petition to Governor Arnold Schwarzenegger, urging him to use his authority to request the federal government to convene the Endangered Species Committee to exempt the operations of state and federal water delivery systems from the draconian measures that will inflict serious economic and social harm to millions of Californians.

The petition also asks President Obama to act favorably on the request.

Federal bureaucrats have imposed a regulatory drought on California by requiring that water supplies be diverted from farms and cities to various fish species. Governor Schwarzenegger has stated that the federal government's biological opinion used to justify severe water restrictions in California's Sacramento-San Joaquin Delta "puts fish above the needs of millions of Californians and the health and security of the world's eighth-largest economy." Join PLF and sign our petition to urge action to keep water flowing that is critical to family farms, farm workers, rural and urban residents, and to our national food security.

Salutation:  Mr.  Mrs.  Ms.  Dr.
